

OBJECTIVE

Full-Stack Developer focused on building modern web applications with Next.js, React, and TypeScript. Experienced in responsive dashboards, authentication flows, multilingual interfaces, and performance-focused UI architecture with strong attention to clean design and user experience.

SKILLS

|              |                                                                                   |
|--------------|-----------------------------------------------------------------------------------|
| Frontend     | Next.js, React, TypeScript, JavaScript, Angular, HTML5, CSS3, Tailwind CSS        |
| Data / Tools | MongoDB, MySQL, Git, GitHub, Vercel                                               |
| Core Skills  | Responsive Design, API Integration, Authentication, Component Architecture, UI/UX |

WORK EXPERIENCE

Full-Stack Developer

Mainstream / Kinotechy (2026-present)

- Developing production-level web applications using Next.js, React, TypeScript, and MongoDB.
- Building scalable dashboards, authentication systems, and responsive user interfaces.
- Improving application performance, frontend architecture, and overall user experience.

Freelance Full-Stack Developer

(2023-present)

- Delivered full-stack web applications using React, Next.js, and MongoDB.
- Built responsive dashboards, business systems, and modern UI interfaces.
- Optimized application performance and implemented API integrations.

Front-End Developer

LEPL Levan Samkharauli National Forensics Bureau (2024-2025)

- Developed front-end applications using Angular and JavaScript, improving usability and workflow efficiency.
- Integrated SQL-backed systems and optimized database interaction performance.

Front-End Developer

Syllogia (2022-2024)

- Built responsive front-end applications using Angular, JavaScript, and HTML/CSS.
- Improved user engagement through responsive UI development and optimized workflows.

PROJECTS

TBC Internet Banking Clone

Next.js • React • TypeScript • Tailwind CSS

- Developed a production-style banking dashboard inspired by TBC Bank with authentication, transfers, templates, and multilingual support.
- Built responsive UI with dark/light themes and reusable component architecture using Next.js App Router.
- GitHub: [github.com/GogaDanelia06/tbc-web](https://github.com/GogaDanelia06/tbc-web)

Job Application Tracker

Next.js • React • MongoDB • TypeScript

- Developed a modern kanban-style job tracking platform with authentication and dynamic dashboard functionality.
- Implemented API integrations, database functionality, and responsive user interfaces.

EDUCATION

Ivane Javakhishvili Tbilisi State University (TSU)

2024–2025

Master’s Degree in Information Systems

Georgian-American University (GAU)

2018–2022

Bachelor’s Degree in Information Technology
